

## **TRANSMATIC CVT MV PLUS**

## SECTION 1 - IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product Name:	TRANSMATIC CVT MV PLUS		
Product Use:	ATF Fluid		
Supplier:	Vertex Lubricants NZ		
	22 Marphona Crescent Takanini 2105 Phone: 09/640 0004		
	Email: info@vertexlubricants.co.nz		
Emergency Number:	0800 353 645		
Chemical Nature:	Distillates (petroleum), hydrotreated heavy paraffinic, solvent-dewaxed heavy paraffinic		
Issue Date:	16 July 2024 and is valid for 5 years from this date.		

## **SECTION 2 – HAZARDS IDENTIFICATION**

HSNO Classification Not classified.

This material is not classified as hazardous according to criteria in the Hazardous Substances (Hazard Classification) Notice 2020.

This material is not classified as DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 Transport of Dangerous Goods on Land.

GHS label elements		
Signal word	No signal word.	
Hazard statements	No known significant effects or critical hazards.	
Precautionary statements		
Prevention	Not applicable.	
Response	Not applicable.	
Storage	Not applicable.	
Disposal	Not applicable.	
Other hazards which do not	Defatting to the skin.	
result in classification	USED ENGINE OILS	
	Used engine oil may contain hazardous components which have the potential to cause skin	
	cancer.	
	See Toxicological Information, section 11 of this Safety Data Sheet.	

## **SECTION 3 – COMPOSITION / INFORMATION ON INGREDIENTS**

#### Substance/mixture: Mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives.

Ingredient name	% (w/w)	CAS number
Distillates (petroleum), hydrotreated heavy paraffinic	≥60 - ≤75	64742-54-7
Distillates (petroleum), hydrotreated heavy paraffinic	≥10 - ≤30	64742-54-7
Distillates (petroleum), solvent-dewaxed heavy	≤3	64742-65-0

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4 – FIRST AID MEASURES**

Description of necessary fir	rst aid measures	
Inhalation	If inhaled, remove to fresh air. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Get medical attention if symptoms occur.	
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.	
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if symptoms occur. If skin irritation or rash occurs: Get medical advice/attention.	
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.	
Indication of immediate medical attention and special treatment needed, if necessary		
Notes to physician	Treatment should in general be symptomatic and directed to relieving any effects. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.	
Protection of first aiders	No action shall be taken involving any personal risk or without suitable training.	

## **SECTION 5 – FIRE FIGHTING MEASURES**

Extinguishing media	
Suitable	In case of fire, use foam, dry chemical or carbon dioxide extinguisher or spray.
Not suitable	Do not use water jet.
Specific hazards arising	In a fire or if heated, a pressure increase will occur, and the container may burst.
from the chemical	
Hazardous combustion	Combustion products may include the following:
products	carbon oxides (CO, CO2) (carbon monoxide, carbon dioxide) nitrogen oxides (NO, NO2 etc.)
Hazchem code	Not available
Special precautions for	No action shall be taken involving any personal risk or without suitable training. Promptly
firefighters	isolate the scene by removing all persons from the vicinity of the incident if there is a fire.
Special protective	Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and
equipment for fire-	full turnout gear.
fighters	

## **SECTION 6 – ACCIDENTAL RELEASE MEASURES**

### Personal precautions, protective equipment and emergency procedures

For non-emergency	If specialised clothing is required to deal with the spillage, take note of any information in
personnel	Section 8 on suitable and unsuitable materials. See also the information in "For non-
	emergency personnel".
For emergency	If specialised clothing is required to deal with the spillage, take note of any information in
responders	Section 8 on suitable and unsuitable materials. See also the information in "For non-
	emergency personnel".

Vertex Lubricants

Oils // Grease // Coolant // Chemicals	Oils /	/ Grease	// Coolant //	Chemicals
--	--------	----------	---------------	-----------

Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and material fo	r containment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.

## **SECTION 7 – HANDLING AND STORAGE**

Precautions for safe handling	Put on appropriate personal protective equipment (see Section 8).	
Conditions for safe storage, including any	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see	
incompatibilities	Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Store and use only in equipment/containers designed for use with this product. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.	
Not suitable	Prolonged exposure to elevated temperature	

## **SECTION 8 – EXPOSURE CONTROLS AND PEROSNAL PROTECTION**

#### **Control parameters**

## **Occupational exposure limits**

	Expective limits
Ingredient name	Exposure limits
Distillates (petroleum), hydrotreated heavy paraffinic	HSWA 2015 - HSW (GRWM) 2016.
	Workplace exposure standards (WES)
	(New Zealand). [Oil mineral]
	WES-TWA: 5 mg/m <sup>3</sup> 8 hours. Issued/
	Revised: 6/2016 Form: Mist
	WES-STEL: 10 mg/m <sup>3</sup> 15 minutes. Issued/
	Revised: 9/2010 Form: Mist
Distillates (petroleum), hydrotreated heavy paraffinic	HSWA 2015 - HSW (GRWM) 2016.

	Revised: 9/2010 Form: Mist

## **Biological exposure indices**

No exposure indices known

Recommended	Reference should be made to appropriate monitoring standards. Reference to national		
monitoring	guidance documents for methods for the determination of hazardous substances will also		
procedures	be required.		
Appropriate engineering	All activities involving chemicals should be assessed for their risks to health, to ensure		
controls	exposure is adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.		
Individual protection meas	sures		
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.		
Eye protection	Safety glasses with side shields.		
Hand protection	Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Nitrile gloves. The correct choice of protective gloves depend upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.		
Skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.		
Respiratory protection	In case of insufficient ventilation, wear suitable respiratory equipment. The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.		

## **SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance	
Physical state	Liquid.
Colour	Green. [Light]
Odour	Unfragranced [Slight]
рН	Not applicable.
Melting point/freezing	Not available.
point	

Vertex Lubricants

Boiling point, initial boiling point, and boiling range	Not available.
Drop Point	Not available.
Flash point	Closed cup: >200°C (>392°F) [Pensky-Martens ASTM D 93]

### Auto-ignition temperature

Ingredient name	°C	°F	Method
bis(nonylphenyl)amine	440	824	EU A.15

#### Vapour pressure

Ingradiant name	Vapour Pressure at 20°C			Vapour pressure at 50°C		
Ingredient name	mm Hg	kPa	Method	mm Hg	kPa	Method
Distillates (petroleum),						
hydrotreated heavy	<0.07501	<0.01	ASTM D 5191			
paraffinic						
Distillates (petroleum),						
hydrotreated heavy	<0.07501	<0.01	ASTM D 5191			
paraffinic						
Distillates (petroleum),						
solvent-dewaxed heavy	<0.07501	<0.01	ASTM D 5191			
paraffinic						
bis(nonylphenyl)amine	<0.01	<0.0013	EU A.4	0.0019	0.00025	EU A.4

Relative vapour density	Not available.
Density	<1000 kg/m <sup>3</sup> (<1 g/cm <sup>3</sup> ) at 15°C

### Solubility(ies)

Media	Result
water	Not soluble

Viscosity Kinematic: 34.4 cSt at 40°C Kinematic: 7.2 cSt at 100°C (ASTM D 445)

#### **Particle characteristics**

Median particle size Not applicable.

## **SECTION 10 – STABILITY AND REACTIVITY**

Chemical stability Possibility of hazardous	The product is stable. Under normal conditions of storage and use, hazardous reactions will not occur. Under
reactions	normal conditions of storage and use, hazardous polymerisation will not occur.
Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Vertex Lubricants

## **SECTION 11 – TOXICOLOGICAL INFORMATION**

### Information on likely routes of exposure

Inhalation	Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Ingestion	No known significant effects or critical hazards.
Skin contact	Defatting to the skin. May cause skin dryness and irritation.
Eye contact	No known significant effects or critical hazards.

#### Symptoms related to the physical, chemical and toxicological characteristics

Inhalation	No specific data.
Ingestion	No specific data.
Skin contact	Adverse symptoms may include the following: irritation dryness cracking
Eye contact	No specific data.

#### Potential chronic health effects

General	USED ENGINE OILS Combustion products resulting from the operation of internal combustion engines contaminate engine oils during use. Used engine oil may contain hazardous components which have the potential to cause skin cancer. Frequent or prolonged contact with all types and makes of used engine oil must therefore be avoided and a high standard of personal hygiene maintained.
Inhalation	Not applicable.
Ingestion	Ingestion of large quantities may cause nausea and diarrhea.
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/ or dermatitis.
Eye contact	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Mutagenicity	No known significant effects or critical hazards.
Teratogenicity	No known significant effects or critical hazards.
Developmental effects	No known significant effects or critical hazards.
Fertility effects	No known significant effects or critical hazards.

#### Aspiration hazard

# Name Distillates (petroleum), hydrotreated heavy paraffinic

## **SECTION 12 – ECOLOGICAL INFORMATION**

## Ecotoxicity

No known significant effects or critical hazards.

## Persistence and degradability

Expected to be biodegradable.

#### **Bioaccumulative potential**

This product is not expected to bioaccumulate through food chains in the environment.

## Mobility in soil

Mobility Soil/water partition coefficient (KOC)	Spillages may penetrate the soil causing ground water contamination. Not available.
Other ecological information	Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.

#### SECTION 13 – DISPOSAL CONSIDERATION

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## **SECTION 14 – TRANSPORT INFORMATION**

## SECTION 15 - REGULATORY INFORMATION

#### **New Zealand Regulatory Information**

HSNO Approval Number	None assigned.
HSNO Group Standard	None assigned.
HSNO Classification	None assigned.

#### Regulation according to other foreign laws

REACH Status	For the REACH status of this product please consult your company contact, as identified in Section 1.
United States inventory (TSCA 8b)	All components are active or exempted.
Australia inventory (AIIC)	All components are listed or exempted.
Canada inventory status	All components are listed or exempted.
China inventory (IECSC)	At least one component is not listed.
Japan inventory (CSCL)	At least one component is not listed.

Tel: 0800 353 645

Korea inventory (KECI) Philippines inventory (PICCS) Taiwan Chemical Substances Inventory (TCSI) All components are listed or exempted. At least one component is not listed.

All components are listed or exempted.

## **SECTION 16 – OTHER INFORMATION**

Date of issue/Date of revision

16 July 2024

This MSDS contains only safety-related information. For other data see product literature.

MSDS SUMMARISES OUR BEST KNOWLEDGE OF THE HEALTH AND SAFETY HAZARD INFORMATION OF THE PRODUCT AND HOW TO SAFELY HANDLE AND USE THE PRODUCT IN THE WORKPLACE. EACH USER MUST REVIEW THIS MSDS IN THE CONTEXT OF HOW THE PRODUCT WILL BE HANDLED AND USED IN THE WORKPLACE.

IF CLARIFICATION OR FURTHER INFORMATION IS NEEDED TO ENSURE THAT AN APPROPRIATE RISK ASSESSMENT CAN BE MADE, THE USER SHOULD CONTACT THIS COMPANY SO WE CAN ATTEMPT TO OBTAIN ADDITIONAL INFORMATION FROM OUR SUPPLIERS OUR RESPONSIBILITY FOR PRODUCTS SOLD IS SUBJECT TO OUR STANDARD TERMS AND CONDITIONS, A COPY OF WHICH IS SENT TO OUR CUSTOMERS AND IS ALSO AVAILABLE ON REQUEST.

Please read all labels carefully before using product.
