

SAWCOOL BIO 3600 HP

PRODUCT DESCRIPTION

Vertex Sawcool Bio 3600 HP is an all-natural saw blade lubricant designed to provide optimal cleaning, lubrication, and corrosion protection.

Our highly refined, plant oil-based product outperforms all petroleum-based products by providing increased lubricity and shear resistance without harmful chemical lubricating additives. It also has a higher flash point and lower vapour pressure, improving user experience by reducing inhalation of fumes. The advanced base oil composition is non-irritating on human skin, reducing rash and eczema for operators and mechanics with sensitive skin.

Our exclusive formulation processes create a molecularly polarised oil, which allows it to adhere to metal surfaces. This characteristic generates constant lubrication of metal friction surfaces, resulting in a smoother running and cleaner chain/blade, longer-lasting sharpness, and cooler running temps.

Our plant-based lubricant is entirely non-toxic, biodegradable, and food-safe, making it perfect for environments where contamination from petroleum oils and their chemical additives is undesirable.

APPLICATIONS & BENEFITS

- Manufactured from renewable biodegradable plant-based lubricants.
- Exclusive formulation provides superior adhesion to metal surfaces – lowers friction and heat.
- Prolongs equipment life.
- Completely non-toxic and non-irritating to human skin.
- Perfect for environments where contamination from petroleum oils is a consideration.

PACK SIZES AVAILABLE

1000L IBC

ADDITIONAL INFORMATION

Designed for New Zealand Conditions | Manufactured from virgin base stocks. For more technical information please contact Vertex Lubricants NZ Technical Dept. +64 9 640 0004. Sheet updated 19 July 2023.
